EDUCATION

University of South Florida *Orlando, FL*
Bachelor of Science | Industrial Engineering, Philosophy Minor *Graduation May 2027*

Valencia College *Orlando, FL*
Associates in Arts | S.T.E.M. Engineering Pathway *Graduated December 2024*

AFFILIATIONS

Institute of Industrial and Systems Engineers (IISE), Engineers Without Borders (EWB),
Institute for Operations Research and the Management Sciences (INFORMS)

EXPERIENCE

Feed Hunger Now | Urban Farm R&D Intern *March 2025 – Present*

- Designed a systems-based revitalization plan for Feed Hunger Now's hybrid farm, applying project management, operations research, digital simulation models, and community-focused workflows to optimize resource use and support scalable, tech-integrated agriculture.

Papa Diesel's BBQ | Line Cook/Back of House *June 2024 – July 2025*

- Streamlined kitchen operations by improving resource efficiency, ensuring health/safety compliance, and enhancing team productivity in a fast-paced environment.

Valencia Philosophy Society | Secretary/Co-Founder *August 2023 – April 2024*

- Researched, authored, and presented philosophy lectures, facilitated discussions, and maintained a database of meeting minutes and 130+ member contacts.
- Established administrative systems, managed correspondence, events, governance, and maintained club records, including constitution and by-laws.

PROJECTS

Feed Hunger Now | Smart Farm System Revitalization *March 2025 – Present*

- Spearheaded a full-scale revitalization plan for a hybrid hydroponic/soil farm using operations research, systems design, and modular subprojects (Maintenance, Operations, Education, Outreach) to optimize workflows and community impact.
- Designed and implemented linear & integer programming, network, and queuing models in Python and Excel to simulate real-world constraints, while building a public-facing digital portfolio featuring interactive roadmaps, stakeholder charters, and a tech innovation pipeline (agricultural drones, digital twins, mobile tools).

MIT Reality Hack | "RAM" Synthetic Psychological Environment *January 2025*

- Led a team in developing Reaching Alienated Minds (RAM), a social media simulation to educate youth on online safety and prevent extremist pipelining.
- Designed simulation mechanics and narrative scripts, integrating psychology, behavioral science, and game design for an immersive educational experience.
- Developed Unity-based player interactions, including branching dialogue systems and decision-based outcomes with real-time feedback analytics.

SKILLS

Software Experience: Advanced Excel, AutoCAD, Autodesk Fusion, Unity, Adobe Creative Suite (Photoshop, Premiere Pro, Lightroom)

Programming Experience: Python, VBA, SQL, MATLAB

Analytical: Project Management, Research Methodologies, Linear Programming

Languages: Intermediate Proficiency in French
